

The **HZDR Innovation GmbH** is a technology transfer company for the development and production of prototypes and demonstrators, as well as for the realisation of service and production orders from industry, drawing on the know-how and infrastructure of the Helmholtz-Zentrum Dresden-Rossendorf (HZDR). We turn innovative ideas into marketable high-tech products. By involving HZDR scientists in commercialisation projects, we also qualify them in fields of application that go beyond science.

Customers of our services and products are both scientific institutions and industrial companies. The service spectrum of HZDR Innovation is broad and ranges from analytical and production services to measuring devices and a wide variety of sensors. HZDR Innovation aims to increasingly develop new products and services to market maturity and bring them to market. For this, we need support in the area of product development and production management. Therefore we are looking for

Employees for Production Management (m, f, d) in part-time

Range of tasks (by individual arrangement depending on subject area, competence and interest)

- Project Management & Quality Management
- Production preparation, supplier selection and qualification
- Production and assembly of demonstrators, pilot and small series

Requirements and competences

- Preferably university degree in the STEM field (esp. doctoral students, scientists, technicians, laboratory assistants of the HZDR)
- Knowledge and previous experience in the respective field of application
- Communication skills

We offer you

- Attractive remuneration either on a part-time basis or as a part-time job (e.g. 450€ mini-job) and/or in the form of commission
- Professional guidance and qualification opportunities
- Job prospects

Have we aroused your interest?

Then apply now. We look forward to receiving your detailed application by e-mail to: personal@hzdri.de. For a first contact, Dr. Björn Wolf is also available by phone at 0351 / 260 3348.
