

## INQUIRY FORM: Purchase Order Software MagOpS

PLEASE SEND ORDER TO: [sales@hzdri.de](mailto:sales@hzdri.de)

### Features of MagOpS

for determination of magneto-optical (MO) response for multilayer structures with

- Single magnetizable layer of known MO coupling constant (SINGLE)
- Multiple magnetizable layers of known MO coupling constant (MULTI)
- Multiple magnetizable layers of unknown MO coupling constant (SERVICE)

Purchase software for research & development purposes only: We are looking forward to receiving your inquiry. Please let us know which software you would like to purchase and which additional services should be fulfilled. We will get back to you shortly with an offer.

Magneto-optic response of multilayer structure, containing multiple magnetizable layers (in any sequence) of unknown magneto-optical constants, can be simulated. Optical constants of all layers, magneto-optical constants of all unknown magnetizable layers will also be determined. Pricing and tenure of complete process depends on complexity of the structure and demand at that moment.

Licence	Test Phase	1 year licence	2 years licence	5 years licence
SINGLE	14 days	999 €	1.899 €	4.499 €
MULTI	7 days	2.999 €	5.999 €	14.999 €
SERVICE		Depends on contract. Please ask for Quotation.
